BORDER PLANTING OF LUPINES AND IRIS

INTRODUCTION

This Fall Supplement is not a full list of our stock. It is designed to call your attention to such plants and bulbs as are best set in autumn, with some new varieties, and older ones omitted from this season's ANNUAL.

We have added a number of new rockery plants and perennials not listed in the 1930 Annual, but for our complete list of these plants consult the Annual. A copy will be sent promptly for the asking.

Prices in no case include postage or express charges, but are simply for plants or bulbs boxed and delivered to our nearest office. For those of our customers who prefer to receive their plants and bulbs by parcel post, we shall be pleased to forward in this manner such plants and bulbs as can be sent in this way at the following additional cost, which must be added to the value of each order to cover the cost of postage and special packing necessary: to all points east of Mississippi River, 10% extra; to all points west of the Mississippi River, 20% extra. Peonies by express only.

Copies of our catalogue will be gladly sent to anyone. If you have mislaid your ANNUAL, ask for another.

PROTECTING PLANTS

Autumn planting is all right if done at the right time and the plants properly cared for. Perennials can be safely cut back and sent the first week in September; Iris and Peonies late in August if preferred. Shrubs, roses, vines and trees should not be moved until all growth for the season is past, which is not usually until after the middle of October. For transplanting evergreens late August and first part of September seem to be best for fall.

A little protection is essential for nearly all the hardy plants in winter; not a protection so much against frost, for this is natural to them, but a protection against mild winter weather. Plants that are hardy enough for the severest winter weather may be killed by alternate freezing and thawing. Nature often provides protection in the dead foliage falling about the plant but we should protect them with three or four inches of marsh hay or straw put on in early November, with a little brush to prevent this covering being blown off. Shrubs and roses set out in the fall are helped by a banking of earth for several inches above the level of ground. A foot or more of this banking is not too much for roses.

Part of Our Field of "Home-grown" *Lilium Candidum*

LILIES

Most of the lilies of this list may be sent in September; a few however, like *Auratum*, *Speciosum*, *Henryi*, and the beautiful *Sargentia* do not ripen until late September or early October. Our Home-grown *L. Candidum* are ready August 1st.

Lilium Candidum makes a green leaved growth in the fall and needs to be in the ground in time to get this growth. Our bulbs of *Candidum* from France are due and promised for the middle of September. Set the bulbs of *candidums* two and one-half inches under and place a covering of straw or hay over them just before winter. All other lily bulbs are planted five or six inches under, and protected for winter with either straw or coarse strawy horse manure, put over the tops of beds just before hard freezing in the fall. Do not cover *L. Candidum* with manure.

	EACH	DOZ.
<i>Lilium auratum</i>. GOLD-BANDED JAPAN LILY.	\$.60	\$6.00

	EACH	DOZ
L. philadelphicum. A fine native Lily which is found growing on sandy soil and usually in partial shade. It demands good drainage and seldom thrives in heavy soil.15	1.50
L. regale. A magnificent new Lily from China, with a vigorous constitution, medium height, bearing one to several handsome, white, fragrant flowers; slightly shaded pink outside and the lower inner surface primrose-yellow. Large size bulbs not available until October 15th to 20th. Large size bulbs, 6 to 8 inches circumference, (\$35.00 per 100).50	5.00
Strong flowering bulbs, 5 to 6 inches circumference, (\$22.00 per 100).30	3.00
Flowering size bulbs, 4 to 5 inches circumference, (\$12.00 per 100).20	2.00
L. sargentiae. This beautiful Lily, a native of Thibet and local in its distribution, grows taller than regale with its flowers in a cluster at the summit. Its white flowers have a chocolate shading outside. It doesn't seem to like much moisture in winter and well-drained soils suit it best.	1.00	10.00
The <i>Lilium Speciosums</i> are desirable for color and bloom in the garden after the phlox and other bright colored flowers are past. The delicate form and color make them useful for cut flowers.		
L. speciosum, var. album. About the same as the well-known <i>L. speciosum rubrum</i> , except that the flowers are white. August and September.60	6.00
L. speciosum var. rubrum. This fine, late-blooming plant from Japan is one of the most showy of Lilies; of medium height, and not difficult to grow. Blooms in August and September. Large flowering bulbs.60	6.00

SPRING FLOWERING BULBS

Planting

A good time to plant Tulips, Narcissi, Hyacinths and Crocuses is during October and early November, before the earth freezes.

These bulbs will thrive in any well-drained garden soil, but the addition of bonemeal will assure you extra fine flowers.

And it will help them if you place a handful of clean, gritty sand under each bulb when planting. This is especially helpful in heavy or wet soil.

How deep to plant bulbs is a question that is sometimes a worry, especially since bulbs of the same variety often vary in size.

A fairly accurate rule is to cover a bulb to a depth of about twice its height. That is—a bulb 2 inches high would be planted 4 inches deep, from the top of the bulb to the level of the soil.

Plant the bulbs with a pointed stick, or dibber, which may be notched to indicate the various depths. Be sure to cover the bulbs closely and firmly with earth.

For naturalizing or planting in sod, turn back the sod in small sections, work in a little bonemeal, plant the bulbs and put the sod back.

Tulips. Plant early varieties 4 to 5 inches apart, 5 inches deep. Darwins and Breeder Tulips, 5 to 6 inches apart, 6 inches deep.

Narcissi. Plant smaller sorts 4 to 6 inches apart; larger, 6 to 8 inches apart, 4 to 6 inches deep.

Hyacinths. Plant 6 to 8 or 10 inches apart, and 3 to 5 inches deep.

Crocuses. Plant 2 to 3 inches apart (usually scattered irregularly), 3 to 4 inches deep.

DAFFODILS or NARCISSI

Early flowering bulbs, coming before tulips, and after crocuses. Fine for cutting; hardy and easy of culture. Though any good garden soil suits, they prefer rather stiff, deep soil and if the situation is such that they are shaded from the sun a third or half the time so much the better. It is well to cover these bulbs to keep out the frost during the first of the winter when setting is done late.

IRIS

There is probably no other flower having the variety of coloring that the Iris has, that is as easily grown. Dry or well-drained soil is best for the Hybrid Iris, often known as German Iris, while a moist, deep soil is most suitable for the Japanese Iris and such species as *siberica*, *pseudacorus*, *cristata*, and *versicolor*. All Iris are best planted in August or September or even earlier if fully ripened after flowering. Ground bone is the best fertilizer and lime may be added to the soil in planting the Hybrid Iris.

We list below all of our hybrid varieties with brief descriptions and have prefixed the rating of each by the American Iris Society. For our list and descriptions of Species and Japanese Iris, and more complete descriptions of the Hybrids, see our 1930 ANNUAL.

In the following descriptions S. signifies standards or upright petals, and F. the falls or drooping petals.

ORIENTAL POPPIES

The Oriental Poppies (*Papaver orientale*) form a gorgeous set of perennial plants. The immense size of their flowers and their striking colors make a wonderful display. We are offering the following varieties that can be supplied in field-grown plants dormant in August and early September.

Enfield Beauty.

Beautiful salmon, maroon base. Late-flowering. 35 cts. each, \$3.50 doz.

Gerald Perry.

One of the most attractive of the Oriental Poppies yet seen. Large flowers of a uniform shade of apricot pink, conspicuously blotched crimson. 35 cts. each \$3.50 per doz.

PAPAVER ORIENTALE (Oriental Poppy)

Joyce. New. One of the finest Poppies, of cerise and old rose-color, A very good grower and a splendid variety. 2½-3 ft. May. June. 50 cts. each, \$5.00 per doz.

Mahony (Mahogany). Large flowers of a deep carmine purple, almost like the color of mahogany wood. 50 cts. each, \$5.00 per doz.

Mrs. Perry. A fine salmon-rose. One of the best of the large poppies. 35 cts. each, \$3.50 per doz.

Orange Beauty. Flowers very large and of a beautiful orange shaded scarlet, with a large purple blotch at the base of the petals. 35 cts. each, \$3.50 per doz.

Perry's White. A valuable addition to this list. The flowers are pure satiny white, with a crimson-maroon blotch at the base of each petal. 50 cts. each, \$5.00 per doz.

Pygmæa. A curious and interesting dwarf form. Not unlike Orange Beauty in color although the flowers are smaller. 25 cts. each, \$2.00 per dozen.

Royal Scarlet. It is a fine hardy perennial, having great red flowers with dark center. 25 cts each, \$2.00 per dozen.

PEONIES

The Peony is so well known that it hardly needs any description, yet each year sees some improvement in its form and color. We aim to offer the best of the standard varieties, both the old and the newer introductions. By careful selection in planting one can have flowers over a considerable space of time. The best planting time is between August 20th and the middle of September, although they can be set safely any time before the ground freezes.

We give below our list of varieties with brief descriptions and have prefixed the rating of each by the American Peony Society.

All are two-year plants except those listed as "1 year."

8.7 **Albatre.** Rose type. White, midseason, very fine. \$1.00 each.

A Few Additions to the List of Plants Offered in our 1930 Annual

Prices of the following 25 cents each, \$2.00 per dozen, unless otherwise noted.

Adenophora potanini. An attractive and dwarfish species of the campanulaceæ. Large blue flowers.

Anchusa myosotidiflora. Robust foliage, attractive the entire season with mounds of dainty blue flowers in May resembling the Forget-me-not. 35 cents each, \$3.50 per dozen.

Anemone sylvestris. This is one of the best in moist, sandy soils. Bears good-sized, delicate white flowers on long stems in latter part of May.

Gaillardia Portola. A new variety distinct in its upright and vigorous growth. Bright coppery scarlet, with petals margined golden yellow. 50 cents each, \$5.00 per dozen.

Sutton's Crimson Glow. A gaillardia of a rich crimson color, showing very little yellow.

Gentiana thibetica. Fine dark green foliage and white flowers. 18 inches.

Polemonium Prima Donna. A dwarf form of Jacob's Ladder with delicate blue flowers. 12 inches.

Potentilla bicolor. Masses of handsome foliage covered with lemon yellow flowers with reddish centers.

Primula polyanthus Munstead Strain. Flowers of the largest size exhibiting wonderful shades of yellow, from cream to rich orange, also pure white and charming "eyed" flowers.

Scabiosa japonica. This variety resembles *S. caucasica* but it is not quite as tall.

Statice tatarica. Flowers purplish red; attractive foliage. One to two feet high. August-September.

Thermopsis caroliniana. A fine hardy perennial not generally offered. Handsome, pea-like spikes of bright yellow three feet high. July.

Trollius Canary Bird. A rare variety producing large globular flowers of soft yellow and in the greatest profusion. 50 cents each, \$5.00 per dozen.

- V. incana.** Woolly Speedwell. 1 foot. July and August. A white woolly plant with numerous blue flowers. It is of good appearance both in and out of bloom.

FOR THE OUTDOOR LIVING ROOM

Horsford's Hardy Perennial Borders

The "Outdoor Living Room" idea has swept the country. Nothing could be more useful or suitable as an addition to the yard or garden in quickly carrying out this idea than one of our carefully worked out borders of perennial plants. Each border has a blue print showing the exact placing of the plants. With the taller varieties at the back, these Borders are especially valuable to place against a fence, garage, or in the corner of the yard or garden. They are designed especially to give harmony of color and a succession of bloom.

Border No. 1, 20'x6', 144 plants in 24 varieties..... \$20.00

Border No. 2, 30'x6', 216 plants in 30 varieties..... \$30.00

Border No. 3, 100'x4', 319 plants..... \$50.00

The list of plants in these Borders will be given, upon application to anyone interested. The blue print is forwarded just as soon as the order is received. While we are glad to advise our customers as to the best arrangements of plants for their needs, we must ask that we be not requested to furnish more than the blue print with these collections.

If you are interested in making a larger border or a complete Perennial Garden, write us. We can make up an individual design that will be attractive in appearance, give bloom the entire season, and will be planned in detail with exact estimate of cost.

Viola Jersey Gem

A recent introduction that has proved to be one of the finest perennial flowering plants ever sent out. It is absolutely hardy under all conditions and flowers continuously from May until frost. The color is a true violet-blue and the individual flowers are very large and fragrant, reminding one of a huge Violet. The stems are about six inches long which makes it very popular as a cut flower. It succeeds in sun or partial shade and is not particular as to soil. 25 cents each, \$2.00 per dozen, \$15.00 per 100.

V. Jersey Jewel. A new and worthy addition. It is strong-growing, with large flowers of a true pansy-violet shade. 50 cents each, \$5.00 per dozen.

V. White Jersey Gem. Identical with Jersey Gem except in color. 35 cents each, \$3.50 per dozen.

The Regal Combination

The Regal strains of Lupines and Delphinium and the Regal Lily have proved to be the most popular and valuable items that we have offered in recent years. The Lupines, with their varied shades, including yellows and bronzes and many bicolored, bring a novel touch to the early garden bloom. The Regal Delphinium, in their turn, furnish bloom that is "truly regal" in colors that range from pink shades to deep blue, and with flowers that are mostly double. The Regal Lily is similar in shape to the Easter Lily but has the advantage of being slightly shaded pink outside and the lower, inner surface primrose yellow. It is a very hardy and reliable addition to the perennial garden.
